Boxes conveyors

Optimized installation : the conveyors are integrated efficiently in the wine process.

Boxes conveyors are made of several parts linked together (turns, etc).

Study for integration in your premises.

Space optimization

The conveyors can be installed on their feet or hanged to the wall to save space.

Strong

The components of conveyors are made of stainless steel 304L, acetal and polyethylene.

- Efficient integration in the wine process thanks to a wide variety of combination possibilities.
- Fit to all type of containers, full or empty.
- Resistant and long-lasting materials.
- Creation of specific products on request.

- Frame made of stainless steel 304L
- Link chains made of acetal, pins made of polyethylene
- Side sheet plate is solid and waterproof
- 1 chain pull every 7 links
- Height-adjustable feet
- Suspended mouting depending on configuration
- 0.75 kW motor
- Undercarriage
- Sprocket made of polyamide
- Removable sieve
