

OENOVAR® 200

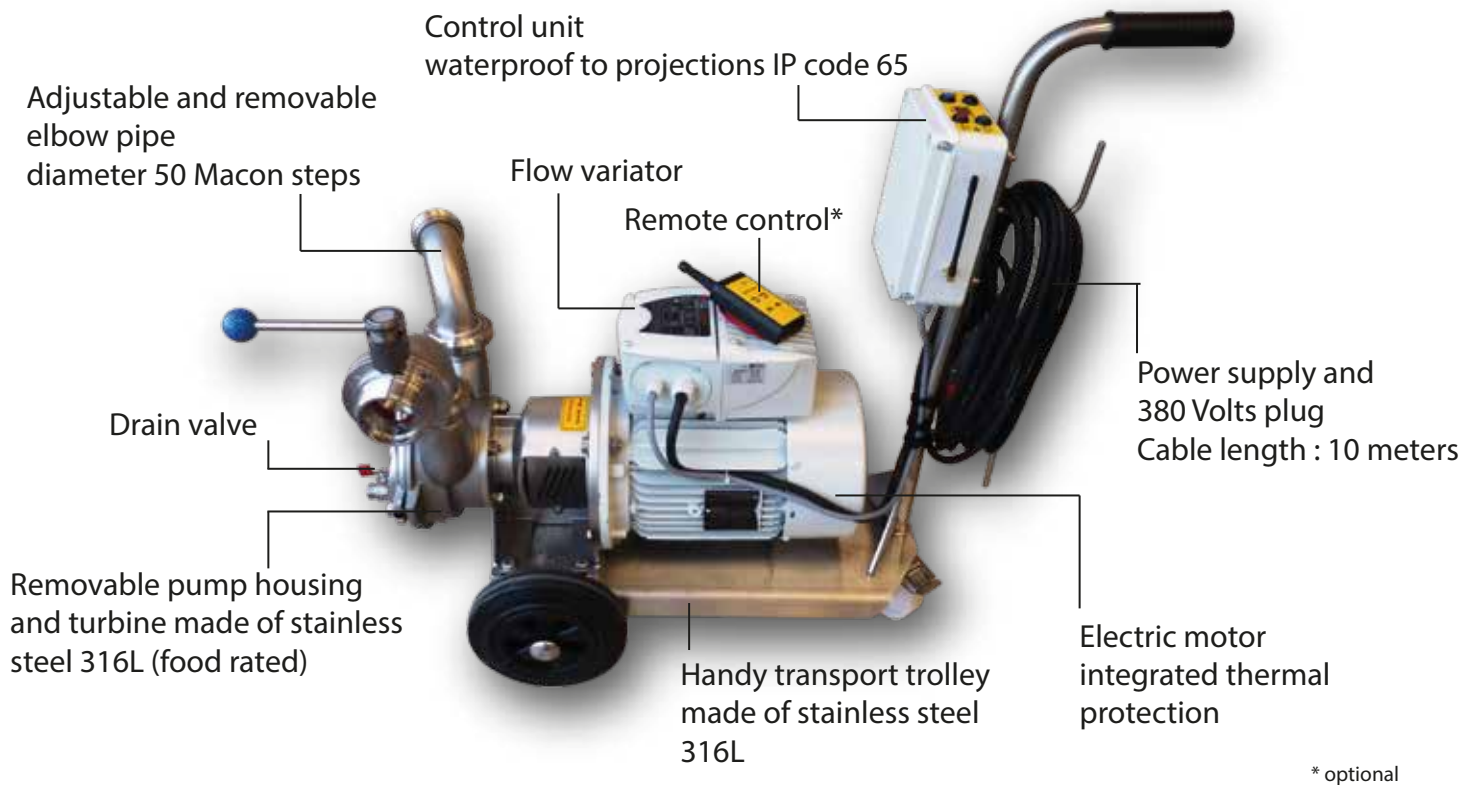

The Oenovar® 200 self-priming wine pump is perfectly suited for the transport of clear liquids (wines, liquors, juices, milk, serum, syrups, oils, pharmaceutical products).

DESCRIPTION

The Oenovar® pump can be used with liquids producing gas or containing foams and/or aspirating air pockets. The quality of its components and materials made it particularly suited for wine and food industry uses.

STRONG POINTS

- Adjustable flow rate of 10 to 200 hl/h maximum
- Suitable for the transport of most liquids

* optional
