RETROFIT

Replacement of obsolete units control

UPGRADE YOUR RIDDLING INSTALLATION

Your riddling installation is 10 years-old or older ? Its unit control is now obsolete, it is safer to replace it. The new generation of units control has up-to-date functionalities which will bring you more comfort and more performance.

THE BENEFITS OF RETROFIT

More comfort

The recent functionalities of the new generation of units control will bring you more comfort while using it : unloading set-up function, intuitive Gyroprog® software to create your own riddling programs, backlit LCD display, etc.

More performance

The recent units control have more powerful and more resistant electronic components than the old ones. You're extending the lifespan of your riddling installation.

Make the most of it : revise your complete installation

Take advantage of the intervention of our staff to revise your Gyropalette® at the same time as the installation of the new unit control. We check the complete installation, verify the mechanical elements and operate the necessary greasing points.

What is going to change ?
Depending on the unit control that is installed, the retrofit is either complete (housing, components and interface) or partial (only the components and interface are replaced, you keep the housing).

THE CONCERNED UNITS CONTROL

The retrofit affects the units control installed more than 10 years ago but also those installed until 2008.

1981 -1991
LPZ

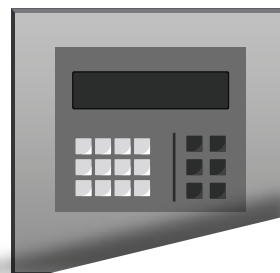

1987-1991
ATCOM

1992-2004
ACAI V1 AND V2

Replacement of obsolete units control

OUR SERVICES

OUR NEW GENERATION OF UNITS CONTROL

SINGLE UNIT CONTROL

Controls one Gyropalette® | User-friendly interface | 9 riddling programs, loadable by USB dongle

EXTENDED CONTROL

Controls several Gyropalette® | User-friendly interface | 5" graphical display | 9 riddling programs, loadable by USB dongle | Display of remaining time before end of the cycle | Modification and creation of riddling programs directly on the unit control

COMMERCIAL UNITS CONTROL

Standard PLC from Siemens or Schneider Electric | Graphical color touch display | User-friendly control of riddling zone | Color codes for a better reading of riddling steps

Multi-group mode (with extended control)
Manage up to 4 groups of Gyropalette® (all kind of riddlers of the range).

4 NEW FUNCTIONALITIES

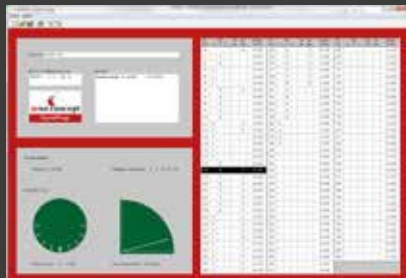

1 Automatic unloading set-up at the end of the cycle on operator action.
Loading set-up function.

3 User-friendly interface, display of riddling steps and remaining time before end of the cycle.

2 Gyroprog® software allowing to create and modify riddling programs (see below).

4 Backlit LCD display : controlling the riddling programs becomes more handy.

GYROPROG®

The software to create your own riddling programs. Compatible with Windows®, it does not have to be installed on your PC. With a USB dongle, you can easily transfer your riddling programs to the unit control.

SUPERVISION

The supervision allows to check at any time that the riddling cycle is running correctly. The surveillance is made from a distance on a dedicated PC.
