STORAGE

WINEPRESS

WINERY

Duo

SOLID

Frame and cages made of hot galvanised steel.

STABLE

Due to the articulation of the cradle at its ends and the direct driving with the inclining endless screw.

RELIABLE

Hot galvanisation, high quality electrical and mechanical components, resistance to cellar humidity, limited maintenance. Direct chainless drive.

MULTI-PURPOSE

Riddling of "504" metal crates by forks or TSR® containers handled by hooks.

LOW CONSUMPTION OF THE MOTORS

Very good mechanical efficiency of the rotating and inclining movements.
3 x 0.37 kW motors.

EASY TO USE

An intuitive operation, integrated riddling programs and USB interface for transfer of customised programs.

Strong points

Frame stability.

In order to ensure riddling **regularity and quality**, it is possible to program low **rotational and inclining amplitudes**.

Possibility to perform **fast riddling** cycles.

Control

Easy creation of riddling programs from your PC with **Gyproprog®** software. Transfer to the unit control via a USB dongle.

SINGLE UNIT CONTROL : 9 storable riddling programs. Control of one device only.

EXTENDED CONTROL : controls one DUO up to a series of 8 devices according to the configuration :

- user-friendly, fully programmable.
- stores up to 9 different riddling programs.
- complete display of the operations : movements and time countdown.
- easy future connection to the unit control of other DUOs in extension.
