

6th side grid

The 6th side grid is mandatory for loading and unloading the riddling container in the Gyropalette® and during the riddling cycle. It prevents bottles from falling.

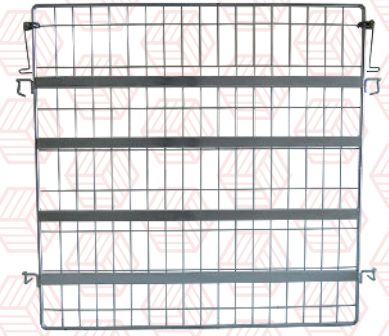

Standard

Reinforced

Transport

- ➔ The standard grid holds the bottles in place during filling and until disgorging.
- ➔ The reinforced grid is designed to hold special conical-shaped bottles.
- ➔ This grid is designed for transporting your riddling containers by road (truck or semi-trailer).
