

LOADING STIRRUP WITH TOGGLE CLAMP

The loading stirrup is made for an easy installation of the spacer bar after the loading of bottles.

Fast and effort-less installation thanks to the lever system.
Suitable for all type of container.

PRODUCT DESCRIPTION

The loading stirrup is suitable for riddling boxes filled with standard or Cremant bottles. It is suitable for all type of Oeno Concept container : 504® box and TSR®. It's easy to use and it requires few effort thanks to the lever system.

OPERATING MODE

- Place the stirrup on the box, on the cases, and lower the handle to lock its position. If the locking is too hard, correct the position of the M10 screw by tightening or loosening it.
- Place the spacer bar.
- Lift the handle. Both sides of the box move aside and are now maintained by the spacer bar.
- Then place the 6th side grid and the riddling gate.
