

# Enhancement kit

for the automated riddling of corked bottles

The kit comprises 4 tubes that are screwed on to each side of the riddling container. It can be used on a standard 504 crate with 4-point gate or standard 6<sup>th</sup> side grille.

## KEY ADVANTAGES

Compatible with the riddling crates with skis and the TSR® with housings.

Assembled and disassembled using bolting on the uprights of the crate.

The bottles are wedged throughout the process, from bottling to disgorgement.
